Brainstorming & Idea Prioritization

Date	03 October 2026
Team ID	SWTID-2026-5999
Project Name	PocketSmart AI — AI-Assisted Goal-Based Budget Planner
Maximum Marks	3 Marks

Step 1: Idea Listing

S.No	Team Member	Idea / Suggestion	Category	Group
1	Gogul M	Start with a fixed budget and automatically divide it into useful spending categories	Budget planning	A
2	Sameer Ahamed T	Use Gemini to convert user preferences into practical item recommendations	Generative AI	B
3	Sabarirajan R	Provide a simple planner interface with clear totals and remaining budget	User experience	C
4	Barathi Shankar R	Add validation, fallback handling and automated testing so incorrect AI output is not shown directly	Reliability	D
5	Kawin M	Save completed plans so users can revisit previous decisions and compare them later	Storage & documentation	E
6	Team	Connect directly to retailer payment systems	Payments	F

Step 2: Idea Prioritization

Group	Final Idea	Feasibility	User Value	Priority	Selected
A	Budget-first allocation for home, event and jewelry planning	High	High	Core	Yes
B	Gemini-generated recommendations from structured preferences	High	High	Core	Yes
C	Simple responsive planner and result views	High	High	Core	Yes
D	Server-side budget verification, fallback plans and automated tests	High	High	Core	Yes
E	User accounts and saved planning history	High	Medium	Supporting	Yes
F	Direct checkout/ payment integration	Low for the current scope	Medium	Future	No

Selected Concept

The team selected a **budget-first planning assistant** rather than a general shopping search engine. The important design decision is that the budget is treated as a hard constraint and the AI is used to propose options, not to perform the final financial calculation.
