Communication

Date	03 October 2026
Team ID	SWTID-2026-5999
Project Name	PocketSmart AI — AI-Assisted Goal-Based Budget Planner
Maximum Marks	1 Mark

Communication Plan

S.No	Communication Type	Frequency	Channel	Participants	Purpose
1	Short progress update	Daily during active development	Team chat	All members	Share completed work and blockers
2	Development review	As features are completed	GitHub	Relevant developers	Review changes before merging
3	AI/backend discussion	As needed	Team chat / Meet	Gogul M, Sameer Ahamed T	Resolve prompt, API and backend issues
4	UI review	As needed	Meet / screen share	Sabarirajan R + team	Check usability and consistency
5	Testing review	Before each final merge	GitHub + team chat	Barathi Shankar R + contributors	Confirm regression status
6	Documentation review	Before submission	Shared repository	Kawin M + all members	Keep phase documents consistent

Communication Challenges and Responses

Challenge	Response
Multiple members editing the same area	Assign an owner to each module and merge through GitHub
AI output changing between requests	Keep output structured and validate it in the backend
Different local environments	Use `requirements.txt`, `.env.example` and clear run instructions
Last-minute documentation mismatch	Keep editable Markdown sources in `docs-src/` and regenerate PDFs together
