Project Demo Planning

Date	03 October 2026
Team ID	SWTID-2026-5999
Project Name	PocketSmart AI — AI-Assisted Goal-Based Budget Planner
Maximum Marks	1 Mark

Demo Sequence

S.No	Demo Section	What Will Be Shown	Duration	Responsible Member
1	Introduction	The budget-first problem and project idea	1 min	Gogul M
2	Architecture	Frontend, FastAPI, Gemini, budget verification and SQLite	2 min	Gogul M
3	Account Flow	Registration, login and dashboard	1 min	Kawin M
4	Home Planner	Enter a fixed budget and home requirements; review allocation	2 min	Sabarirajan R
5	Event + Jewelry Planners	Demonstrate event allocation and optional outfit-image flow	2 min	Sameer Ahamed T
6	Verification and Testing	Show validation, budget constraint and test evidence	1 min	Barathi Shankar R
7	Future Scope & Q&A	Limitations, scalability and future roadmap	1 min	Kawin M + all

Demo Flow

1. Explain the problem: users know the budget but not the allocation.
2. Show the landing page and create/sign in to an account.
3. Build one plan and point out category totals and remaining budget.
4. Explain that the server recalculates the total after Gemini responds.
5. Show the history page and reopen the generated plan.
6. Demonstrate one validation case.
7. Finish with current limitations and future improvements.

Pre-Demo Checklist

- Install dependencies and confirm the application starts.
- Configure the Gemini API key if a live AI demonstration is required.
- Keep a small JPG/PNG/WEBP outfit image ready for the jewelry demonstration.
- Confirm that the database is writable.
- Run the functional tests before the final rehearsal.
- Verify that the GitHub repository and phase PDFs contain the final team names.
